STÉFFEN MÜGEL

Full-Stack Developer & DevOps Engineer

Washington DC–Baltimore Area | muegels@protonmail.com
linkedin.com/in/smuegel | github.com/smueg

PROFESSIONAL SUMMARY

DevOps-focused full-stack developer with a strong Linux CLI and open-source systems background, and 10 years building accessible, high-traffic web applications for federal and higher-ed clients. Reduced deployment overhead 15% via Bash/CI-CD automation, boosted user engagement 25% through end-to-end feature delivery, and maintained WCAG/Section 508 compliance passing Fortify scans. Additional development experience spans Python, JavaScript/TypeScript (Angular), Ruby, PHP, and C#.

SKILLS

Frameworks & Libraries: Node.js, TypeScript, Vue.js, Angular, Django, Laravel, Ruby on Rails, ASP.NET, Entity Framework (ORM), WordPress

Databases: Oracle EE, Oracle RMAN, Microsoft SQL Server

APIs & Integration: REST APIs, GraphQL

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Git, Jenkins, TFS, Jira, CI/CD Pipelines, Linux Administration, Shell Automation

Security & Compliance: OWASP Top 10, NIST Cybersecurity Framework, WCAG 2.1 / Section 508, Fortify Code Analysis

WORK EXPERIENCE

Full-Stack Developer 1/2021 - 2/2026

CACI International, Federal Contractor | National Institute for Occupational Safety and Health (CDC/NIOSH) | Remote

- Built the Angular front-end for a legacy ASP-to-C# modernization initiative, integrating ASP.NET Web API and SQL Server.
- Automated deployment, data migration, and server maintenance, reducing manual overhead 15%.
- Maintained DevOps pipeline (Docker, Kubernetes, Bash), enhancing CI/CD through Jenkins and TFS/Azure DevOps Server, with Fortify scans.
- Coordinated Agile sprints and backlogs in Jira to align development priorities across teams.
- Replaced siloed development with dependency-injected, cross-platform scripting practices, standardizing CI/CD workflows across teams.

Front-End Developer 9/2015 - 12/2020

CACI International, Federal Contractor | National Institute for Occupational Safety and Health (CDC/NIOSH) | Remote

- Served as front-end developer for government WordPress CMS platforms, meeting WCAG/Section 508.
- Developed features in Laravel and Django, boosting user engagement 25% via Adobe Analytics.

Front-End Developer/Web Admin 5/2012 - 9/2015

Center for Economic Analysis and Development, Northern Kentucky University | Highland Heights, KY

- Sole developer and administrator for the organization's PHP/Laravel CMS, serving monthly visitors and business leaders across the Cincinnati metro region.
- Automated backups and security scans with custom Bash scripts.
- Built Django/Python analytical tools that improved reporting for economic research.

Biomedical Informatics Intern (Perioperative Surgical Safety) 9/2011 - 12/2011

Cincinnati Children's Hospital Medical Center | Cincinnati, OH | alongside final coursework

- Replaced a legacy surgical safety system with a new web-based platform, increasing data accessibility 20%.
- Prototyped UI and built a reusable CSS framework for faster modular updates.

EDUCATION

Bachelor of Science, Computer Information Technology

Northern Kentucky University, College of Informatics | Highland Heights, KY

- Gained expertise in web development, software engineering, and database management.
- Completed hands-on projects that strengthened problem-solving and technical skills, including graduate-level coursework as an undergraduate.

https://www.nku.edu/informatics

Bachelor of Arts, International Studies

Northern Kentucky University, College of Arts & Sciences | Highland Heights, KY

- Gained expertise in international affairs, economics, and cross-cultural communication.
- Achieved mastery in a foreign language to strengthen global perspective and engagement.

PROJECTS

AI Assisted Development Prototype

Built a personal search/content classification prototype using the Claude and Gemini APIs (via Claude Code CLI), published to personal GitHub repositories.

Modern Front-End & Caching Exploration

Built component-based interfaces in React, and explored Next.js features including server-side rendering, static site generation, and file-based routing for production-style front-end architecture. Also experimented with Redis for caching and data modeling in personal projects.

Container Runtimes & Microservices Architecture

Evaluated Podman as a rootless alternative to Docker, and designed multi-container microservices setups using Docker and Docker Compose for personal projects.

Secure Tunnel Infrastructure

Architected a self-hosted alternative to Cloudflare Tunnel using Pangolin, Traefik, and WireGuard, designed for full-path encryption instead of endpoint-only security.

LANGUAGES

German: Professional Working Proficiency (International Studies degree; study abroad in Munich, Germany)
