

STEVEN MUEGEL

Full-Stack Developer & DevOps Engineer

Washington DC–Baltimore Area • +1 (614) 963-5651 • muegels@protonmail.com
linkedin.com/in/smuegel • github.com/smuegel

PROFESSIONAL SUMMARY

Full-Stack Developer & DevOps Engineer with 10 years building and deploying accessible, high-traffic web applications for federal and higher-ed clients — code built to survive contact with real users and real audits. Cut manual deployment overhead 15% through Bash/CI-CD automation and grew user engagement 25% building full-stack features across Laravel, Django, and C#, while maintaining full WCAG/Section 508 accessibility compliance and passing federal Fortify security scans. Equally comfortable across JavaScript, Python, PHP, Ruby, and C#, and the Docker/Kubernetes CI/CD pipelines that ship them.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, PHP, Ruby, C#, Bash/Shell Scripting, HTML5, CSS3, SQL
Frameworks & Libraries	Node.js, Vue.js, Angular, Django, Laravel, Ruby on Rails, ASP.NET, Entity Framework (ORM), WordPress
APIs & Integration	REST APIs, GraphQL
Databases	Oracle EE, Oracle RMAN, Microsoft SQL Server
Cloud & DevOps	AWS, Azure, Docker, Kubernetes, Git, Jenkins, TFS, Jira, CI/CD Pipelines, Linux Administration, Shell Automation
Security & Compliance	OWASP Top 10, NIST Cybersecurity Framework, WCAG 2.1 / Section 508, Fortify Code Analysis

PROFESSIONAL EXPERIENCE

Web Applications Developer II (Full-Stack & DevOps) — CACI International, Federal Contractor

09/2015 – 02/2026 | *National Institute for Occupational Safety and Health (CDC/NIOSH/DCAS)* | Remote

- Delivered full-stack upgrades to high-traffic government WordPress platforms, achieving full WCAG/Section 508 accessibility compliance while maintaining platform security through Fortify static code scans and remediating flagged vulnerabilities
- Automated deployment, data migration, and server maintenance using Bash/Shell scripting and Ruby batch jobs — cut manual overhead 15% (an estimated 3–6 hours weekly)
- Built full-stack features spanning Laravel PHP, Django Python, and C# — grew user engagement 25%, measured via Adobe Analytics and in-house reporting tools
- Refactored a legacy monolithic codebase into a modular API system, building the front-end in Angular and the back-end in C#
- Engineered REST/GraphQL API integrations with SQL Server to connect front-end and backend systems in real time
- Maintained the DevOps pipeline: containerized deployments with Docker, orchestrated workloads with Kubernetes, automated releases with Bash, and coordinated CI/CD through Jenkins and TFS/Azure DevOps for consistent Git-based delivery
- Coordinated Agile sprints and backlogs in Jira, driving project tracking, analytics, and reporting across full-stack development teams
- Mentored team members transitioning from legacy workflows on modern CI/CD practices and cross-platform scripting (Bash/PowerShell), advocating for dependency injection over siloed local development

Web Developer/Administrator — Center for Economic Analysis and Development, Northern Kentucky University

05/2012 – 09/2015 | *Highland Heights, KY (Cincinnati-Metro)*

- Built and administered PHP/Laravel CMS sites supporting 10,000+ monthly active users
- Automated backups and security scans with custom Bash scripts
- Built Django/Python analytical tools that improved reporting for economic research
- Redesigned key pages mobile-first — boosted user retention 20%

Biomedical Informatics Intern (Perioperative Surgical Safety) — Part-Time — Cincinnati Children's Hospital Medical Center

09/2011 – 12/2011 | *Cincinnati, Ohio* | ~30 hrs/week alongside final-semester coursework

- Replaced a legacy surgical safety system with a new web-based platform — increased data accessibility 20%
- Prototyped UI and built a reusable CSS framework for faster modular updates

PERSONAL PROJECTS

Independent, self-directed work outside of paid employment — included to show current tooling exploration and initiative.

- AI-Assisted Development Prototype: Built a personal search/content-classification prototype using the Claude and Gemini APIs (via Claude Code CLI), published to personal GitHub repositories
- Modern Front-End Exploration: Experimented with React and Next.js on independent projects
- NoSQL Data Stores: Explored Redis and other NoSQL databases for caching and data-modeling experiments
- Container Runtime Exploration: Evaluated Podman as a rootless alternative to Docker for personal container workflows
- Microservices Architecture: Designed and ran multi-container microservices setups using Docker and Docker Compose for personal projects
- Secure Tunnel Infrastructure: Architected a self-hosted alternative to Cloudflare Tunnel using Pangolin, Traefik, and WireGuard, designed for full-path encryption rather than endpoint-only security

EDUCATION

Bachelor of Science in Computer Information Technology — Northern Kentucky University, College of Informatics

Highland Heights, KY (Cincinnati-Metro)

- Earned a Bachelor of Science in Computer Information Technology from Northern Kentucky University
- Gained expertise in web development, software engineering, and database management
- Completed hands-on projects that strengthened problem-solving and technical skills, including graduate-level coursework as an undergraduate

Study Abroad Program — Ludwig Maximilian University of Munich

Munich, Germany

- Completed a Study Abroad Program at Ludwig Maximilian University of Munich
- Focused on German language, culture, international economics, and cross-cultural business communication
- Strengthened global perspective and foreign language proficiency

Bachelor of Arts in International Studies — Northern Kentucky University, College of Arts & Sciences

Highland Heights, KY (Cincinnati-Metro)

- Earned a Bachelor of Arts in International Studies from Northern Kentucky University
- Gained expertise in international affairs, economics, and cross-cultural communication
- Achieved mastery in a foreign language to strengthen global perspective and engagement

Percussion Studies Program — University of Cincinnati, College-Conservatory of Music (CCM)

Cincinnati, Ohio

- Refined percussion techniques through intensive conservatory training and peer collaboration
- Specialized in orchestral, chamber, and contemporary music, demonstrating versatility and adaptability
- Built a strong foundation in musicology and music theory, supporting both performance and pedagogy

LANGUAGES

German: Professional Working Proficiency
